***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 4, 7, 8, 10, 12, 13, 16, and 17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1 and 10 recite "a second surface substantially conforming to the inside diameter of a downhole tool" which is not illustrated with the milled recess embodiment in Figure 9. The examiner notes there is no embodiment described or shown depicting a preformed interface configured to engage at least one milled recess and having a second surface substantially conforming to the inside diameter of a downhole tool.

***Allowable Subject Matter***

Claims 19, 21 and 22 are allowed.

### ***Response to Arguments***

Applicant's arguments, see page 5, filed 18 September 2006, with respect to the rejection of claims 1, 3, 4, 7, 10, 12, 13, and 16 under 35 U.S.C. 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new rejection is made noting lack of enablement. While applicant's disclosure has the separate claimed limitations (recess and formed interface), in order to meet the enablement requirement the drawings must illustrate the mounting surfaces 44a, 44b (Fig. 6) in grooves 54 and conforming to the inside diameter. The examiner does not consider such an illustration to be intuitive. Ergo, this embodiment is not considered disclosed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hall et al. (7064676) disclose, in Fig. 15, a transmission line bonded to a tool.
